

Collaborative Leadership for Development

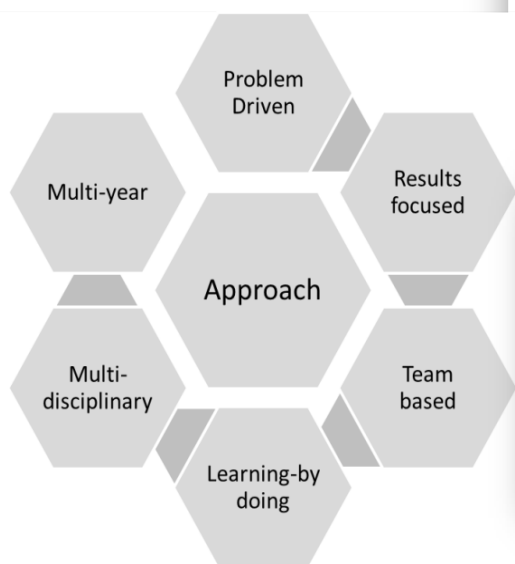

What is CL4D?

The World Bank Group’s (WBG) Collaborative Leadership for Development (CL4D) program is designed to help clients accelerate the implementation of development projects. CL4D complements the World Bank Group and client government technical work in designing reforms (the “what”) by addressing the adaptive implementation aspects of a reform process (the “how”). Focusing on the behavioral changes that are required to navigate complex challenges, CL4D helps client government teams develop the capacity to mobilize key stakeholders, build coalitions, and achieve results.

CL4D Approach

Mobilizing stakeholders and resources to address complex challenges and create public value
